

# SKILLS USA

## MARINE TECHNOLOGY

The new skills challenge for this year will be very similar to last year. We will have 3 labs set up plus a written test and an interview done by Yamaha factory employee. The labs will consist of a head shimming lab, an electrical lab (student can bring their own volt/ohm meter but must have a diode scale) and a identify parts lab. All labs and the test will have a time limit.

I look forward to seeing everyone and have fun.
